Dear ISWI Participant: Dr. Werner Balogh
[Programme Officer – Basic Space Technology;
Space Applications Section;
Office for Outer Space Affairs (OOSA);
United Nations Office at Vienna] has the following
message for you. Regards, George Maeda, Editor.

----- Message to be posted see below -----

Dear Colleagues,

As part of this year’s International Astronautical Congress to be held from 27th September to 1st October 2010 in Prague, Czech Republic, sessions dedicated to space weather and related issues will be organized that should also be highly relevant to ISWI activities. I would greatly appreciate if you would consider submitting an abstract to session “E3.2. Policy and economic aspects of space weather”, which is part of the “23rd Symposium on Space Policy, Regulations and Economics”.

Session Description:
Space weather slowly emerges as a policy item. While it has long been only a scientific question, its economic relevance is steadily growing due to its effects on commercial space activities in particular in the field of telecommunications. In addition, space weather is expected to become an element of new Space Situational Awareness projects so that international coordination should be foreseen. This session reflects on such questions of

impact and coordination.

Session Organizers:

Chairs: Werner Balogh (UNOOSA), David Kendall (Canadian Space Agency),

Rapporteur: Wolfgang Rathgeber (European Space Policy Institute)

The Call for papers can be found at

<http://www.iafastro.com/docs/2010/IAC2010_CallForPapers.pdf> . Abstracts dealing with issues such as international coordination of space weather-related activities will be very welcome. The deadline for abstract submission is 5 March 2010. Please do not hesitate to contact me (werner.balogh@unoosa.org) should you have any question related to this particular session.

For your information please note that in addition there will also be a more technical session "D5.3. Space Weather Prediction and Effects on Space Missions" as part of the "Symposium on Safety, Quality and Knowledge Management in Space Activities".

With best regards,

Werner Balogh

Uploading IAC Abstracts

You can upload abstracts for papers for the International Astronautical Congress (IAC) on the IAF website at <http://www.iafastro.net> .

Uploading papers can be summarised as follows:

- * Log in from the home page
- * Click "My Papers"
- * Click "Add new abstract"
- * Enter the paper title and a short summary of 400 words
- * Specify if you are a student or not
- * Select the Symposium and Session in which you wish to post your abstract
- * Click OK and check your abstract's preview in PDF format
- * If you see the message "abstract successfully uploaded", it means that your abstract has been successfully added to the system
- * Add your co-authors (maximum 4)
- * Log out
