# First Announcement

## 2011 workshop on the International Space Weather Meridian Circle Project (ISWMCP)

Website: <http://iswmcp2011.csp.escience.cn/dct/page/65560>

*Sanya, Hainan Island, China*  
*Feb. 20 - 25, 2011*

Chinese Meridian Project is a ground-based chain mainly along 120°E to monitor China's geospace environment, which will start operation from Jan. 1, 2011. An new initiative, called the International Space Weather Meridian Circle Project (ISWMCP), is proposed to connect 120°E and 60°W chains of ground-based monitors all over the world (mainly in Australia, Brazil, Canada, Russia, and the USA), which will enhance the ability of scientists to monitor the space environment worldwide. The main purpose of ISWMCP would be to coordinate observations and share data among stations along the meridian to obtain the most scientific benefit for the global space weather community. The 2011 workshop will focus on the scientific objectives, collaboration framework, and future implement plans etc. of ISWMCP.
