: Hayabusa, the satellite mission  
:  
:

Dear ISWI Participant:

This news is not directly related to space weather but it is relevant to the exploration of space. The news is that a motion picture has been made about "Hayabusa" -- this is the first time in human history that a satellite was launched from Earth, travelled to an asteroid, grabbed a piece of that asteroid, and returned to Earth with that sample. The satellite made a dramatic return to Earth on 13 June 2010.

Details on this mission can be found here:  
<http://en.wikipedia.org/wiki/Hayabusa>

Attached is a photo of a promotional poster put out by the producer of this new film. I spotted it in the halls of our university.

Faithfully and cordially yours,  
: George Maeda
