: Re:
: Update to the previous CALLISTO report.
:
:

Dear ISWI Participant:

I just received an update to the previous CALLISTO report.
It is from Christian Monstein in Zurich and here it is
(between the + and the &):

: +
Dear friends and colleagues
Attached an update to the 2nd ISWI Callisto-status report #35 of this year.
Callisto at SSRT in Siberia was one of the stations in the e-Callisto
network which could observe the CME-signature at meter-&decimeter
wavelengths at very low interference level and high signal2noise ratio.
Best regards, Christian Monstein, Institute of Astronomy,
: ETH Zurich, HIT G13.2, Wolfgang-Pauli-Strasse 27
: CH-8093 Zurich, Switzerland
: &

The first attached file is a radio frequency plot.
The second attached file is a movie of the sun.

Reminder: A solar eclipse will take place over the Pacific
tomorrow. Large parts of Japan will see a total eclipse.
In Japan, it will occur not too long after sunrise.

Most faithfully yours,
: George Maeda
