: Re:  
: Outreach Activity of Japan:  
: Hirameki Science Program of JSPS.  
:

Dear ISWI Participant:

Each year the International Center for Space Weather Science and Education takes part in the HIRAMEKI TOKIMEKI SCIENCE program of JSPS.

Subtitle of it is:

: "Welcome to a University Research Lab-Science That Inspires".

This program is described by JSPS as follows:

: "Established in FY 2005, this program offers opportunities for  
: school children to better understand the meaning of science  
: and its role in their daily lives by visiting and experiencing  
: firsthand a university laboratory. During these visits, the  
: results of research supported by Grants-in-Aid for Scientific  
: Research (Kakenhi) are described in easy-to-understand language.  
: The aim of the program is to promote science study and ultimately  
: to advance research by stimulating the intellectual curiosity  
: of the young participants while cultivating in them a rich  
: sense of creativity, along with a keen awareness of science's  
: cultural value and societal importance."

For more information (in Japanese only):

<http://www.jsps.go.jp/hirameki/index.html>

Recently, we did our hirameki here by inviting school children to ICSWSE for a few hours to "show them the fun of science".

-----> I attach some photos.
