: Public Out Reach at SERC  
: on 30 Jan 2011.  
:

Dear ISWI Participant:

One major element of ISWI is explaining our work to the general public.

Here at SERC we do that periodically. We invite the local community to come to our humble research center and "touch our hardware". We set up special scopes so that they can view the surface of the sun. Kids can make special cut-out eyeglass for viewing the sun. We explain "space weather" to them, using very large computer displays. We try to make it as fun as possible --- to stimulate their interest in space weather. They pay taxes. We use their tax money. We need to explain to them why it is money well spent --- I think all of us have that obligation.

I attach photos of a recent "out reach to the public" (30 Jan. 2011). SERC staff and students managed this event. When you conduct similar events, please send to me the photos for newsletter circulation.

Respectfully yours,  
: George Maeda

# Public Out Reach

(explaining our work to  
the general public)

Conducted at SERC  
on 30 January 2011.  
About 30 persons from the  
general public attended.

There are 3 pages to this pdf.

# Viewing the sun with special scope.
