: Re:
: New ISWI features of SERC website.
:
:

Dear ISWI Participant:

SERC (the publisher of this newsletter) has been busy upgrading its website to accommodate the ongoing developments of ISWI. Please refer to the attached pdf.

It shows two new links on the Main Page of our website. One is internal and one is external. The internal link takes you to a "Table of Contents" that allows you to access all the talks that were delivered during the "MAGDAS Session" of the 1st ISWI Workshop (last year in Helwan, Egypt); you can download a large variety of documents in PDF. [If you use any of this material, you are required to give credit to the original source.]

The external link (ISWI Newsletter) takes you directly to the archives of the ISWI Newsletter. This archive is maintained by the Bulgarian Academy of Sciences as part of the official ISWI website.

Respectfully yours,
: George Maeda
: The Editor
: ISWI Newsletter

Portion of SERC web site (www.serc.kyushu-u.ac.jp)

The screenshot displays the SERC website interface. On the left, there are four vertical navigation menus: 'Project and Research', 'Space Weather Information', 'Data Service', and 'Misc.'. The 'Misc.' menu has 'MAGDAS Session Results' circled in red. The main content area features a large photograph of a group of people at a conference table, with the text 'International Conference Kamchatka, Russia' overlaid. A yellow callout box points to a new link in the top navigation bar. On the right, there are links to 'ISWI International Space Weather Initiative' and 'ISWI Newsletter Archive', with the latter circled in red. Below these are links for 'International Heliophysical Year: the 50th year celebration of IGY' and 'Inter-university Project IUGONET Metadata DB for Upper Atmosphere'.

Project and Research
